SURFACE CREATIONS

Material Viewing Waiver

Company: _____ Designer: _____

Job ID: _____ Job Name: _____

Product: _____ Color: _____

We highly recommend viewing the actual slab(s) to be used in your application. If you are electing to waive your viewing, please read and understand this form, and acknowledge by signing below.

Disclaimer

All slabs have unique characteristics and will vary from samples. The samples are small select cuts from a slab; they do not exhibit all the characteristics of a design and therefore are not fully representative of what will be installed. We advise viewing the actual slab(s) to be used in your application. If you are electing not to view your material, please be advised that we do not guarantee, nor are we responsible for any differences in shading, viening, movement, color tone, or any other variations found between samples and slab(s). Transfer of ownership occurs once the fabrication begins and no returns, refunds or replacements due to these variations will be allowed.

Natural Stone:

Variations in color, pattern, shape, size and shade are inherent and unique characteristics to be expected with natural stone. Granite, marble, soapstone, quartzite, and other natural stones may have natural pitting and fissures that can be seen and/or unseen. The samples serve as a general indication of the way the colors, markings and textures are usually found within a stone. These characteristics will vary from lot to lot, and even slab to slab within the same lot.

Manufactured Stone:

Variations in color, pattern, shape, and shade are intentional characteristics and should be expected with any manufactured stone. Color pools are purposeful additions in the composition of many designs to enhance the natural beauty. Samples will not exhibit all of the characteristics of a design, and therefore are not fully representative of what will be installed.

Please be advised that by waiving your right to view, you are authorizing Surface Creations to use their discretion in selecting the material used for your application. Where seams are located in the stone, the pattern and shading of the material may change. No claims will be accepted once the fabrication has started for reasons of color, pattern, veining, or other characteristics.

I am electing not to view the stone for my application and I understand that I am waiving my rights of selection and claims as noted above.
