

SURFACE CREATIONS

STEEL SUPPORT BRACKETS

Ensuring Safety and Stability

18" FLAT BRACKET

24" FLAT BRACKET

14" X 8" L BRACKET

IMMEDIATE AVAILABILITY

We now stock steel support brackets in our company vehicles for your convenience. Should a stone overhang require reinforcement, we can provide the necessary hardware on-site to keep your project moving forward and ready for a successful installation.

INSTALLATION POLICY

Please note that while Surface Creations will provide the bracket, we do not perform the installation. A contractor must install all brackets to verify that cabinets and wall studs are structurally sufficient to bear the weight of the stone.

SUPPORT STANDARDS

- **Natural Stone:** Required for overhangs over 10"
- **Quartz, Mineral Surfaces, and Dekton:** Required for overhangs over 15"
- **Large Spans:** Support leg required over 20"
- **Two-Thirds Rule:** Support is required if at least 2/3 of the stone weight is not resting on the cabinetry
